PROH MS

Installation and basic configuration guide

1. Download installation file
2. Download and run "PROH MS setup x.x.x.exe" file
3. On the initial window, click on "Next"

4. Choose destination folder by clicking on "Change" button or click "Next" button to install to default folder (C:\XPR\PROH MS)

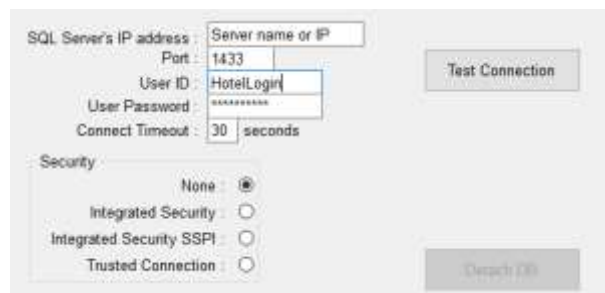

5. Shortcut on desktop "PROH MS" will be created, double click to start the software
6. If it's new installation, database setup window will appear (Picture 4)
** If there was previous PROH MS installation, with SQL server already configured, then login window will appear instead of database setup

(Picture 4, Database setup)

* PROH MS works with SQL Database
* "SQL Server 2008 R2" must be installed on server PC (Link included, picture 4)
* SQL Server installation is not required on client PC's (if any)

- Select the first option "SQL Express" if the current PC will be used as Server
- If the current PC will be only used as a client, and a server is on remote (network) location, select second option "SQL Server (not default database location)"

(Picture 5, parameters for connecting to SQL Server)

- Change SQL Server name or IP address to match the server location
- Default SQL port is 1433, port must be configured in windows firewall to allow remote connections (help link included, picture 4)
- User ID and password is "HotelLogin/HotelLogin" by default, it is created by the software automatically but any other user with access can be used as well

- After parameters are set, click on "Test connection" button, if successful you will get "Connection OK" confirmation
- Database setup window will close and you can open the software by double click on desktop icon (PROH-MS)

7. Login screen will appear, type username and password (default: admin/admin) to enter the software
